# Dlaczego git?

“

18-latek chciał

**WYCZYŚCIĆ**

komputer, **WYSADZIŁ**

mieszkanie

”

A photograph of five men standing in a room, likely a workshop or office. From left to right: a man with dark hair in a purple and yellow striped sweater; a man with long hair and glasses in a plaid shirt; a man with short brown hair in a maroon hoodie; a man with short brown hair in a tan sweater; and a man with long curly hair and a beard in a blue sweater, resting his chin on his hand. The background features a wooden wall with a mounted animal head, a bookshelf, and a boat model.

## BACKLOG

Set the table  
(No knives for Dad!)  
2

Make the gravy  
2

eat meal  
4

Serve pie  
1

Boke the pies  
5

Serve booze  
(no hard liquor for old people)  
2

Argue over politics  
4

Argue over the size of pie slices  
2

Prep and roast the turkey  
3

serve meal  
2

Fake headache to get 15 minutes of peace & quiet  
1

Dele out left overs (not booze!)  
2

CARVE turkey  
3

Give thanks before meal (don't forget family this year)  
1

Argue over religion  
3

Guilt guests into helping clean up.  
1

Staunch bleeding after cutting self carving bird  
1

Ignore complaints about lumpy gravy  
1

Cut mom off from booze  
1-2

Send written apologies after the smoke clears.  
2

Argue with mom about cutting her off from booze  
2

## In Progress

Practice deep breathing techniques to calm self.  
3

Choose seating assignments to minimize conflict.  
10

## Completed

Invite family members (yes, even in-laws)  
1

Order turkey from butcher  
1

Decide on menu  
4

Complain about turkey prices  
5

Decide on booze  
8

Go food shopping  
3

Buy booze (take SUV)  
2

## Team Scrum Board

[Plan](#)
[Work](#)
[Report](#)
[Board](#)

SPRINT: Sprint 3

QUICK FILTERS:

[Product](#)
[UI](#)
[Server](#)
[Only My Issues](#)
[Recently Updated](#)

### To Do

- TIS-28  
 ↑ Research options to travel to Pluto  
 5
- TIS-8  
 ↑ Requesting available flights is now taking > 5 seconds

### In Progress

- TIS-27  
 ↑ Add Phobos and Deimos Tours as a Preferred Travel Partner  
 8
- TIS-10  
 ↑ Bad JSON data coming back from hotel API
- TIS-25  
 ↑ Engage Jupiter Express for outer solar system travel  
 5
- TIS-20  
 ↑ Engage Saturn Shuttle Lines for group tours  
 3

### In Review

- TIS-58  
 Add feedback button to the plugin sample code
- TIS-45  
 ↑ Email non registered users to sign up with Teams In Space  
 2

### Done

- TIS-9  
 After 100,000 requests the SeeSpaceEZ server dies
- TIS-16  
 ↑ Establish relationship with local office supplies company  
 3
- TIS-7  
 ↑ 500 Error when requesting a reservation
- TIS-11  
 ↑ Register with the Mars Ministry of Labor  
 2

# Przydatne komendy

# gitk

The screenshot shows the gitk application window titled "gitk: libgit2". The interface is divided into several sections:

- Commit History:** A vertical list of commits on the left. The current commit is highlighted in blue and labeled "Improve test of submodule name sorting". Other visible commits include "Cleanups", "Fix submodule sorting in workdir iterator", "Add faster git\_submodule\_is\_submodule check", and "Merge pull request #2229 from linquize/Wdeclaration-after-statement".
- Commit Details:** A table on the right showing the commit message and author information. The current commit is by Russell Belfer <rb@github.com> on 2014-03-31 13:33:11.
- Search:** A search bar with the text "commit containing:" and a dropdown menu.
- Diff View:** The main area shows a diff for the file "tests/diff/submodules.c". The diff is in "Patch" mode. The commit message "Improve test of submodule name sorting" is visible at the top of the diff view.
- Metadata:** Below the search bar, there is a section for commit metadata including Author, Committer, Parent, Child, Branches, Follows, and Precedes.

AS A PROJECT DRAGS ON, MY GIT COMMIT MESSAGES GET LESS AND LESS INFORMATIVE.

ENG-11: Summarize changes in around 50 characters

More detailed explanatory text, if necessary. Wrap it to about 72 characters or so. In some contexts, the first line is treated as the subject of the commit and the rest of the text as the body. The blank line separating the summary from the body is critical (unless you omit the body entirely); various tools like `log`, `shortlog` and `rebase` can get confused if you run the two together.

Explain the problem that this commit is solving. Focus on why you are making this change as opposed to how (the code explains that). Are there side effects or other unintuitive consequences of this change? Here's the place to explain them.

Further paragraphs come after blank lines.

- Bullet points are okay, too
